Viktor Niderman

Full-stack Web Developer in PHP (Laravel) and JS (Vue), as well as a developer of extensions for Google Chrome.

EXPERIENCE

Primobrowser LLC, *United States, remote* — **FullStack Developer**
Feb 2023 - Present

I've created Google Chrome browser extensions focused on UI enhancements and task automation, utilizing JavaScript (Vue.js) for reactive interfaces, and the Chrome API for deep browser integration. These extensions are supported by robust backend communication via REST API, crafted with Lravel for server-side operations and MySQL for data management. I was also responsible for setting up and maintaining the backend on AWS.

Newizze, *Portugal, Porto* — **FullStack Developer**
Feb 2021 - Jan 2023

I'he developed Laravel and Vue.js web applications, integrating real-time WebSocket communication and Stripe for payment processing. My responsibilities also extended to configuring and managing the backend on Google Cloud, ensuring scalable and secure operations.

Gendalf — *Web Development* **Teacher**
Feb 2019 - May 2021

Taught web development (HTML, CSS, JavaScript, PHP) with engaging, hands-on lessons and integrated current tech trends.

PROJECTS

Primo Browser — *https://primowebbrowser.com*

Developed a ticket reseller website using the "Landrick" template and Orchid framework, featuring Primo Browser access. Built a custom CRM system, integrated Laravel WebSockets for real-time communication, Vue.js for interfaces, and Stripe for secure payments.

HouseNovel — *https://housenovel.com*

Enhanced an online platform for easily searching, sharing, and preserving U.S. home history. The site facilitates uncovering stories of houses and neighborhoods, encouraging preservation. It incorporates HTML, CSS, JavaScript, and Blade for smooth user experience, with Laravel and MySQL for backend stability, supported by AWS.

The Ecofleet — *https://app.ecofleet.co.uk*

Created a parcel ordering service from A to B using eco-friendly couriers (bikes, eco-scooters) for small business clients. Features included address, weight input, and delivery confirmation via photo. Integrated Onfleet API, with Laravel backend and Vue.JS frontend.

StubTools — *https://stubtools.com*

Developed a website and Chrome extensions using JavaScript, Vue, React, and Bootstrap for the frontend, and Laravel, and MySQL for the backend. Features included real-time Laravel WebSockets, Stripe for payments, and custom Chrome Extensions like 2FA. Hosted on Google Cloud.

Work permit in:

🇮🇱 **Israel**, 🇵🇹 **Portugal** (🇪🇺 **EU**), 🇷🇺 **Russia** (prefer remote job)

SKILLS

Front:

HTML, CSS, JavaScript, SASS, Vite, Bootstrap, Vue, React, Nuxt, Next, Axios, Webpack, Chrome Extensions

Back:

PHP, Laravel, Node, MySQL, Stripe**,** Linux, Google Cloud, AWS**,** Git, REST API

EDUCATION

MASA, *Israel*

Six-month Web Development program (React, Node)

Newizze Academy, *Portugal*

Training in full-stack development with Laravel and Vue under the mentorship of an experienced senior developer, alongside other developers.

Southern Federal University — *Bachelor*

Specialization: Informatics and Computer Engineering, a 4-year curriculum at the Department of Systems Analysis. The program covered programming in Java, C++, and Python, database management with SQL, basics of systems analysis, network architecture, and an introduction to AI and machine learning, equipping me with essential tech skills.
